Adam Tang Software Engineer

t: 510.842.7832 e: adamtang@gmail.com <u>Portfolio</u> <u>Linkedin</u> <u>GitHub</u>

Skills

JavaScript, React.js, Redux, HTML, CSS, RESTful APIs, Python, Flask, Node.js, Express.js, SQL, PostgreSQL, SQLAlchemy/Sequelize ORMs, GitHub, AWS, Heroku, Jira

Projects

Mira Live site | aithub

React / Redux, Python / Flask, SQLAlchemy / postgreSQL, HTML5, CSS3, Canvas API, JavaScript, Heroku A clone of Jira Service Management where users can collaborate on projects and issues

- Implemented a custom algorithm that utilized adjacency list in the backend to make the issue status flow a seamless experience.
- Applied customized design and functionality to the react-select library for smooth user experience (UX) in dropdown menus.
- Built in a rich text editor to give the user full ownership over descriptions and comments with advanced text editing functionality with the react-quill package.

Sound Town <u>live site</u> <u>github</u>

Redux, React Player, Python / Flask, SQLAlchemy / postgreSQL, HTML5, CSS3, JavaScript, AWS, Heroku *A Soundcloud clone where users can upload and share music, create playlists*

- Integrated a persistent React Player with Redux's global store resulting in a responsive playback controller.
- Crafted a custom React component to display a queue panel showcasing previous, current, and upcoming tracks to provide the user with up-to-date track information.
- Utilize Flask and AWS S3 for music and image asset storage and management which allows users to upload songs, a personal avatar, and a profile page banner for a more personalized experience.

Journium live site | github

React / Redux, ExpressJS, Sequelize / postgreSQL, HTML5, CSS3, JavaScript, Heroku

A clone of Medium, for bootcamp students and people around them to write and share their stories

- Built in a rich text editor to allow the user full ownership over posts, enabling multiple image and video uploads along with advanced text editing functionality with the react-quill library.
- Optimized database usage and eliminated N+1 queries by observing SQL best practices.
- Harnessed the unidirectional state management of Redux to simplify React components and directly manage data for form inputs and form submissions.

Experience

IT Administrator | April 2019 - July 2021

CAD Masters, Inc.

- Managed the custom computer store page of the company's website providing up-to-date information on computer parts to reflect accurate inventory and pricing.
- Built custom computers tailored to engineering clients handling the build and bootup for customers from part acquisition to OS installation along with ongoing technical and IT support after sale.
- Identified operational deficiencies and subsequently implemented and maintained software web tools to address these including Jira, Confluence, XWiki and HelpSpot.

Education

App Academy | Spring 2022

Immersive software development course with focus on full stack web development

University of California, Berkeley | Spring 2006 | Berkeley, CA

BS Nuclear Engineering
